

Dr. Dumitru VULCANOV is a professor at the Faculty of Physics, West University of Timisoara, . Specialist in computational methods applied in cosmology and gravitation theory, he teaches lectures on these subjects at the Faculty of Physics. He was the beneficiary of two NATO advanced research fellowships and, for 9 years, a collaborator of the numerical relativity group from the Albert Einstein Institute, Potsdam, Germany working in numerical simulations for black-holes colisions and violent processes in astrophysics. He has been collaborating with the Romanian Space Agency on different projects since its establishment to the present day.
