

# Artificial Intelligence, Digital Democracy and Parliament

This Summer School aims to foster the creation of a community bringing together members from disciplines in the humanities and social sciences, communication sciences and computer and digital sciences.

The aim is to encourage the emergence of interdisciplinary work on an innovative theme - Artificial Intelligence, Digital Democracy and Parliament - the exploration of which calls for unprecedented collaboration.

The School's ambition is also to identify the training needs - theoretical, practical, technical, methodological - of members of the community, with a view to deepening the work being carried out or considered. In this regard, the School will provide a privileged and appropriate forum for reflection, with a view to developing new targeted pedagogical projects.

The international dimension is also a major asset, promoting and facilitating the international mobility of students, PhD students, post-docs, researchers and teacher-researchers.

## DATES

October 7<sup>th</sup> to October 11<sup>th</sup> 2024

## PERIOD FOR VIRTUAL COMPONENT

June or September/November or December 2024

## DEADLINE FOR APPLICATION

September 6<sup>th</sup> 2024

## LOCATION FOR PHYSICAL MOBILITY

Université de Pau et des Pays de l'Adour  
Anglet and Bayonne campus' - France
