

## **Erasmus+ Programme**

### **Multilateral Inter-Institutional Agreement**

#### ***for Blended Intensive Programme (BIP)***

#### **Key Action 1**

---

### **Sustainability as a Driver of Innovation and Development**

This five-day intensive program explores key sustainability challenges. Through expert-led sessions, interactive discussions, and site visits, participants will gain valuable insights into sustainable solutions. Topics include circular economy, sustainable tourism, industry and energy, and environmental ecosystems, complemented by a visit to an industrial facility and an excursion to an archaeological site.

As part of the Erasmus+ Blended Intensive Program (BIP), the school combines in-person activities with a mandatory virtual component, fostering transnational collaboration and innovative learning. Networking opportunities, including a social dinner, will enhance idea exchange among participants.

By the end of the program, attendees will be equipped with practical knowledge applicable to both academic and professional contexts, earning at least 3 ECTS credits.
